320 Brown St | West Lafayette, IN 47906

Education

Purdue University, West Lafayette, IN May 2019
Master's Degree Computer Graphics Technology
Thesis: Interactive 3D Modeling in VR
GPA: 3.62/ 4.0

West Lafayette, IN May 2016
Bachelor's Degree Computer Graphics Technology
GPA: 3.25 / 4.0

Skills

Programming Languages: C++, JavaScript, HTML, CSS, Python

Software: Adobe Photoshop, Autodesk Maya, Unreal Engine 4

Relevant Experience

Teacher Assistant August 2016 - May 2018

Purdue University, West Lafayette, IN

- Teaching assistant for “An Introduction to Animation and Modeling” and “Digital Lighting and Rendering”.
- Graded, assisted students, instructed labs and occasionally taught in place of the course instructor.
- The class taught students how to utilize Adobe Photoshop and Autodesk Maya.

Research Assistant May 2016

Purdue University, West Lafayette, IN

- Assisted a graduate research student at Purdue with a research project by taking 3-D scans of trees and retopologizing them
- 3D artist for a grad student creating a program named Skippy
- Created and textured snakes using Autodesk Maya, Pixologic ZBrush and Adobe Photoshop
- Skippy Software: <https://dl.acm.org/citation.cfm?id=3073603>

STEM Boot Camp Course Instructor Summer 2018

Purdue University, West Lafayette, IN

- Instructed a summer course for a camp that introduces freshman students in Computer Graphics technology
- Taught students how to use and create in Adobe Photoshop, Autodesk Inventor, Autodesk Maya, and Unreal Engine 4.

SIGGRAPH Student Volunteer July 2016

Anahiem, California

- Participated in SIGGRAPH as a student volunteer representing Purdue University.

Technical Projects

Master's Thesis: Interactive 3-D Modeling in Virtual Reality August 2016 - April 2019

- Created a virtual reality 3D modeling tool using Unreal Engine 4, Visual Scripting and C++
- Used C++ to create the backend code for the generation of meshes using a half edge data structure.
- [Link to Paper](#)

Solar System 2017 - 2019

- Created a solar system using THREE.js (JavaScript graphics library for web)
- The creation of this project included the use of JavaScript to create the user interactions and the main scripting
- Used HTML and Css to display the UI and other controls for the user and the web page elements
- [Link](#)

Adobe Mixamo Animation to Root Motion Script 2018 - 2019

- Maya script using Python
- Allows a root joint to be added to an existing skeletal rig for Unreal Engine 4
- Adds the ability to convert animations found on Adobe Mixamo into root motion
- Converts other animations into in-place animation, and to simply add a root bone to a rigged model or animation.
